## PROJECTS

**TransitOps — Smart Transport Operations Platform** *8-Hour Hackathon Build | 2025*

- Built a full-stack fleet-management platform digitizing vehicle, driver, trip, maintenance, and expense operations with automated business-rule enforcement.
- Developed Next.js/React (TypeScript, Tailwind CSS) frontend and Node.js/Express REST API with Prisma ORM and SQL database (SQLite); secured with JWT authentication and role-based access control (RBAC) for four user roles.
- Modeled state-machine lifecycles with transactional updates, server-side validation (capacity limits, license expiry), and a KPI dashboard (fleet utilization, fuel efficiency, cost analytics).
- **Technologies:** Next.js, React, TypeScript, Node.js, Express, Prisma, SQL, SQLite, REST API, JWT, Git, Agile

**Smart Skin Care — AI/ML Mobile Application** *Group Project | 2024 – Present*

- Developing an Android app that detects skin diseases from uploaded images using deep-learning classification (CNN, MobileNetV2, EfficientNet-B2); outputs disease name, confidence score, and recommended home remedies.
- Built with Flutter frontend, PyTorch/TensorFlow and Pandas for data preparation and model training; integrated with backend via REST APIs.
- **Technologies:** Flutter, Machine Learning, CNN, PyTorch, TensorFlow, Pandas, Python, REST API, Git

## CERTIFICATIONS
